

FIELD STRENGTH METER

A BRIEF HISTORY

SF-721

A double band meter (VHF + UHF) that was ideal during the deployment of the television over the UHF band in Spain.

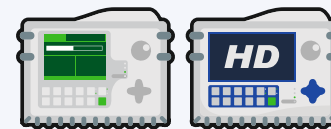

1967

PROLINK-7

Digital TV has arrived to stay. It was the very first one including DTT, microprocessor control and optional expansion cards.

1997

TV EXPLORER

Automatic, including satellite, terrestrial, optional fiber optics and a fraction of the size & weight of other equipment. They were the favourite tools by the installers.

2006

2001 PROLINK-4

The most advanced of PROLINK product range, it was the first with color TFT and DAB digital radio.

2012 HD RANGER

A design never seen before, fully digital, updatable and featuring a user interface that shows three functions at once.

2017 RANGER NEO

A complete redesign of the HD RANGERS. Keeping the same user interface, we boosted their power and introduced the 4K as standard.

DID YOU KNOW...?

The ideas and designs that PROMAX applies to its field strength meters have gradually become standards of the market. **This allows us to state that we are the reference in the world of field strength meters.**

HAVE YOU NOTICED THIS FACT?

During the first 30 years, there were very little changes in broadcasting technology. **Now think on all the advances we have experienced since then!**
