

FIELD STRENGTH METER

A BRIEF HISTORY

1967
SF-721

A double band meter (VHF + UHF) that was ideal during the deployment of the television over the UHF band in Spain.

DID YOU KNOW...?

The ideas and designs that PROMAX applies to its field strength meters have gradually become standards of the market. **This allows us to state that we are the reference in the world of field strength meters.**

HAVE YOU NOTICED THIS FACT?

During the first 30 years, there were very little changes in broadcasting technology. **Now think on all the advances we have experienced since then!**

1997
PROLINK-7

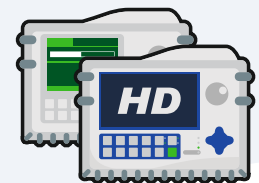

Digital TV has arrived to stay. It was the very first one including DTT, microprocessor control and optional expansion cards.

2001
PROLINK-4

The most advanced of PROLINK product range, it was the first with color TFT and DAB digital radio.

2006
TV EXPLORER

Automatic, including satellite, terrestrial, optional fiber optics and a fraction of the size & weight of other equipment. They were the favourite tools by the installers.

2012
HD RANGER

A design never seen before, fully digital, updatable and featuring a user interface that shows three functions at once.

2017
RANGER NEO

A complete redesign of the HD RANGERS. Keeping the same user interface, we boosted their power and introduced the 4K as standard.
